User interface The first AutoCAD (the 1989 version) featured a GUI similar to Microsoft Office Works. AutoCAD 2016 features a ribbon-based interface for many of its commands. These commands are distributed throughout the application, however some are moved to the Ribbon toolbar. This was done to reduce the number of menu options available, and to maintain a clean look for other UI elements. The User Interface is customizable, and developers can create their own interfaces. An alternative GUI is provided for the Windows Mobile versions of AutoCAD and AutoCAD LT. AutoCAD LT for Windows Mobile was first released in 2000, and still supports Windows Mobile 6.0 and later. As of version 2014, the Windows Mobile GUI is available as a trial version. Sharing AutoCAD LT and AutoCAD share the same installation requirements. A copy of Autodesk Architectural Desktop was previously required. Starting in 2007, Autodesk discontinued support for Architectural Desktop, and it is no longer available from the Autodesk website. With architectural products, a Shareware or Trialware license will generally allow full use of Autodesk Architectural Desktop with no restrictions on the number of users, or the number of drawings or models that can be created. Autodesk Revit Architecture supports Autodesk Architecture LT and Autodesk Architecture LT for Windows Mobile. A copy of Autodesk Revit Architecture was previously required, but starting with version 2012, Autodesk Revit Architecture is no longer required. Autodesk Revit Architecture requires a "home license" and a "site license". The "home license" allows installation and use on up to 5 desktop computers at one time, and the "site license" allows use at a site with at least 10 desktop computers. Autodesk Inventor supports Autodesk Inventor LT. A copy of Autodesk Inventor was previously required, but starting with version 2010, Autodesk Inventor is no longer required. Autodesk Inventor is a commercial software suite. AutoCAD LT for Windows Mobile is available for free as a "lite" version, or for a "full" version with additional features and some restrictions. AutoCAD LT for iPad is available for purchase in two versions: an "enterprise" version (over \$100) and an "individual" version (under \$100). Support Autodesk provides technical support via Autodesk a1d647c40b
