windows 7 activation key without serial 12 windows 7 product key 12. Jan 23, 2022 A new feature in Windows 7 Enterprise that was not present in Windows 7 Home Edition is the capability to activate an OEM computer through the company's "activation center" from the "removable device" security tab. It is also called "limited activation." It allows an end user to activate a PC using the actual OEM serial key rather than the actual product key on the computer's packaging or elsewhere. The serial keys from the OEM packaging were used to create the limited activation activation. The one exception to this is a PC being activated for support purposes, and you receive the OEM serial key for that purpose. This feature is very similar to Microsoft's OEM Advantage Program. Limited activation is used in a similar way to Windows XP where a customer may purchase an OEM copy of XP from the Microsoft OEM website and activate Windows XP through an Internet connection and a serial key.
